

Bee'ah

Bee'ah is a leading environmental management company in the UAE that offers recycling and waste management services.

Case study of the Great Battery Challenge

In its journey of growth and achievement, the Bee'ah School of Environment has made remarkable strides. It now engages with over 250,000 students and 6,000 teachers, spreading environmental awareness across the UAE. Recognizing excellence, 25 winners from 400 schools received prizes totaling AED 240,000. The program expanded to Abu Dhabi, with 90 schools participating for the first time.

Additionally, three schools triumphed in the 'Great Battery Challenge,' a battery recycling competition in partnership with Duracel, resulting in the collection of over 100,000 batteries (almost 2 tonnes) from 110 schools across the UAE.

Please find **news articles** linked to Bee'ah and the services provided to UAE schools

Future Pioneers Award (Bee'ah Education)

An international award aimed at recognizing and rewarding innovative ideas and projects that have the potential to shape the future of sustainability.

The Future Pioneers Awards, formerly known as the Environmental Excellence School Award (EESA), are held under the patronage of Her Excellency Sheikhha Bodour bint Sultan Al Qasimi, Chairperson of the Board of Trustees and President of American University of Sharjah. A benchmark for sustainability innovation offering a total award prize of one million dirhams to the winners. A premier national environmental award, the EESA set new standards for sustainable excellence for over a decade, with over 2,600 entries from participating schools across the UAE.

Tadweer — The Center of Waste Management

Tadweer is responsible for waste management and recycling in the Emirate of Abu Dhabi.

Case study of Sustainability Awareness Programme

Tadweer, the Center for Waste Management in Abu Dhabi, has made significant strides in its goals and achievements. They organised an impactful awareness workshop and training session at Om Al Emirates School in Al Ain City. This initiative, attended by 300 students, emphasised the importance of waste reduction, reuse, and proper separation methods. Tadweer is committed to fostering a culture of sustainability, promoting clean environments and educating the community, especially the future generation, on responsible waste management practices.

Here you will find **articles** on the schools initiatives run by Tadweer

Dulscoco

Dulscoco is a waste management and recycling company that offers a range of services.

Case study of: Emirates Kids Marathon / Green Bins initiative

Dulscoco, a prominent human resource solutions and waste management services company, demonstrated its commitment to sustainability by partnering as the green sponsor at the 'Emirates Kids Marathon.' The event, held at Dubai's Al Mamzar Park in celebration of International Children's Day, aimed to promote a healthy lifestyle and combat childhood obesity. Dulscoco collected an impressive 33,800 recyclables, including plastic and aluminium items, and placed over 125 green bins to encourage waste reduction and recycling. Their Green Team ensured meticulous segregation and recycling of collected materials, emphasising the importance of environmental responsibility among the younger generation.

Here you will find an **article (and several other initiatives)** of Dulscoco and local UAE schools

Emirates Marine Environmental Group (EMEG)

Protection and conservation of endangered species, scientific research in the field of nature, ecosystem conservation. Arrangement of educational camps for school children. Arrangement of volunteering for students together with GEMS World Academy.

leecaplenemeq.wixsite.com

Email: emeg.serdal@gmail.com

WWF UAE

Implementation of the school program in which students receive theoretical knowledge, train on specially modeled cases and practise in a playful way.

emiratesnaturewwf.ae

Emirates Environmental Group

Holding of such events as an environmental drawing competition, a public speaking competition, and eco-workshop cycles for students. The program «grows» young eco-activists by giving them access to different platforms and bringing them together.

The Waste Lab

The Waste Lab is a women-owned Dubai startup. By offering an interactive digital platform, the organization creates a community of individuals and businesses that understand and practise the proper sorting of organic waste, creating healthy compost and other by-products that benefit local soil, farms, food and people.

1) Off-site composting

Designed for home, business and events where there is no room for on-site composting. A subscription or special service includes bins, instructions, pickup service, impact report, rewards, and many more.

2) On-site composting

Consulting, composting systems design, trainings, impact reports and many more for restaurants, hotels, schools, communities, events and any establishments that produce food waste and have room for on-site composting.

Power Knot

The company offers an on-site waste management service. The LFC biogas digester processes food waste onsite through aerobic digestion, a natural process utilizing a special mix of microorganisms, water, and oxygen. The food waste is converted to water that can be safely discharged to sewer lines or filtered to enrich landscape.

Goumbook

An online information center providing details of environmentally conscious businesses and individuals in the UAE and the Persian Gulf. It aims to help organisations improve sustainable development and environmentally conscious ways of working.

goumbook.com

There are several environmental initiatives inside Goumbook:

Youth Action

The aim of the Goumbook Youth Action program is to empower young individuals and help them become environmentally conscious to inspire sustainable living practices in their schools and in their communities, with the support and guidance of Goumbook. Environmental concepts are promoted through recreational activities, educational sessions to plant trees in schools, classes to reduce plastic use and raise awareness of climate change.

Application at the end of the page at:

goumbook.com/youth-action

Give a Ghaf - Meet the Ghaf tree

The aim of the initiative is to raise public awareness of the Gaf tree and its values while encouraging people to plant indigenous trees and conserve water.

Give A Ghaf - Beekeeping to enhance local biodiversity

Managed honeybees remain a critical resource for world agricultural and food security. The environmental initiative supports local beekeeping by planting indigenous trees and engaging companies to adopt beehives and train their employees to learn the skills.

Application at the end of the page at:

goumbook.com/give-a-ghaf-tree-planting

Trees Matter

This new global tree planting program, created in partnership with the Trillion Trees UN Company, is a call to action for businesses and organizations to join forces for a sustainable future.

Application at the end of the page at:

goumbook.com/trees-matter

Drop It

The decision to take part in the campaign means that you will not use water in plastic bottles, but instead will filter and bottle it yourself, which can be used at home, in offices or in public places (including schools). This has an immediate positive impact on the environment by reducing plastic waste and the carbon footprint in the supply chain.

Application at the end of the page at:

goumbook.com/drop-it-rethink-single-use-plastic-consumption

Eat it or save it

«Eat it or save it» raises awareness of reducing food waste by holding information sessions for public and private organizations, as well as organizing practical initiatives to build a team that not only talk about the problem, but also offer solutions that use circular economy thinking and nature-based approaches.

Application at the end of the page at:

goumbook.com/eat-it-or-save-it

Save the Butts

Save the Butts – Waste to Value is the first sustainability initiative run in the UAE that adopts a circular economy approach to environmental pollution that converts cigarette butts into a value-added material.

Application at the end of the page at:

goumbook.com/save-the-butts

Neutral fuels

The company produces the pure biodiesel fuel. Neutral fuels biodiesel is made from waste cooking oil collected from schools and local restaurants. Their biodiesel is certified sustainable by ISCC (International Sustainability and Carbon Certification) and its fuel meets the European standard for Biodiesel, EN14214. The company proposes to use the fuel for school buses. In Dubai, more than 250 buses already use this fuel.
